Skills

- **Languages:** C++, Python, SQL
- **Libraries & Frameworks:** NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, LangChain, LangGraph
- **Tools/Platforms:** Power BI, MS Excel, Git, GitHub, Jupyter Notebook, LLM APIs & Third-Party API Integration
- **Concepts:** OOP, Operating Systems, Computer Networks, DBMS, Machine Learning, Generative AI, RAG, REST APIs, Prompt Engineering
- **Soft Skills**: Problem-Solving, Mental Resilience, Adaptability

Projects

Investment Research Agent | Github | Jun 2026 – July 2026

- **Engineered** a production-ready AI investment research agent by integrating 4 external APIs (Gemini, Hugging Face Inference, Tavily Search, and Alpha Vantage) through LangGraph tool calling to analyze company fundamentals, financial news, and market data, generating structured investment recommendations using a 5-factor scoring framework.
- **Architected** a LangGraph-based orchestration workflow implementing dynamic LLM provider routing (Gemini with Hugging Face failover), Pydantic-based structured output validation, and confidence-aware reasoning to generate reliable, schema-compliant investment recommendations while minimizing hallucinations.
- **Developed** and deployed an interactive Streamlit Cloud application with graceful fallback for external API failures, and end-to-end validation to deliver resilient AI-powered financial analysis.

Movie Recommendation Engine| Github Feb 2026 - Mar 2026

- **Built** a recommendation system using item-based **collaborative filtering** to process a 4.8M+ ratings dataset (MovieLens) and deliver highly personalized Top-N movie suggestions.
- **Designed** a similarity-based engine with **optimized local retrieval**, utilizing NumPy argsort() and Streamlit caching mechanisms to achieve sub-second response times.
- **Developed** an interactive **Streamlit** web application to manage the end-to-end pipeline, enabling real-time movie search and dynamic recommendations.

Diabetes Prediction using Machine Learning | GitHub Nov 2025 - Dec 2025

- **Processed** and structured 5,000+ NHANES government healthcare records using Python, performing exploratory data analysis (EDA) and feature engineering to identify key predictors of diabetes risk.
- Applied **5+ classification models** and evaluated performance using Accuracy, Precision, Recall, and F1-score to stratify patient risk categories.

Training

From Data to Decision: A Hands-On Approach to Data Science Jun 2025 - Jul 2025
Lovely Professional University | Certificate

- Built end-to-end data workflows encompassing data preprocessing, statistical analysis and interactive dashboards.
- Completed intensive hands-on training in Python, SQL, Power BI, and Machine Learning.

Certifications

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate | Oracle | Link Jun 2026
- SQL (Basic & Intermediate) | HackerRank | Link Dec 2025

Achievements

- **Solved 300+ DSA problems** across LeetCode and HackerRank, earning the **LeetCode 100 Days Badge**, **SQL50 Badge,** HackerRank 5-star C++, and **SQL certifications**. Jun 2026
- Appointed as Class Representative (2025–26), managing students' academic concerns effectively. May 2026

Education

Lovely Professional University Punjab, India
Bachelor of Technology - Computer Science and Engineering | **CGPA: 8.14** Aug 2023 - Present

SSN School Rewa, Madhya Pradesh
Intermediate | **Percentage: 83.4%** Jun 2022 - Mar 2023

SSN School Rewa, Madhya Pradesh
Matriculation | **Percentage: 98.0%** Jul 2020 - Apr 2021
